Subject: **Technical Memorandum
Update to Initial Site Assessment (ISA)
SR-60 / WLC Parkway (Formerly Theodore Street) Interchange Project
City of Moreno Valley, California**

Leighton Consulting, Inc. (Leighton) is presenting this Technical Memorandum to update the subject site ISA prepared by Leighton in February 2019. The scope of work described below constitutes the entire update to the ISA, and was agreed upon with the client in advance. A current search of selected government databases for facilities of potential concern was performed using Environmental Data Resources (EDR) environmental database report system, see Attachment 1, *The EDR Radius Map Report™ with GeoCheck®*.

FINDINGS AND CONCLUSIONS

A search of selected government databases for facilities of potential concern was conducted by Leighton using the EDR environmental database report system (i.e. standard records search). The search radii meet the government records search requirements of ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Initial Site Assessment Process*. This updated search did not identify listed facilities, on or off site, likely to have created a Recognized Environmental Condition (REC) on the site. If you have any questions regarding this, please do not hesitate to contact our office. We appreciate the opportunity to be of service on this project.
